PROFESSIONAL SUMMARY

Full Stack Software Engineer with hands-on experience in React.js, JavaScript, ASP.NET Core, REST APIs, SQL Server, HTML5, CSS3, Tailwind CSS, Redux, and responsive web application development. Skilled in frontend development, reusable component architecture, API integration, state management, performance optimization, debugging, and Agile methodologies. Experienced in enterprise applications, Government of Telangana digital platforms, workflow management systems, and e-commerce applications.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Redux, Expo
- **Backend:** ASP.NET Core, REST APIs, Entity Framework
- **Database:** SQL Server, Stored Procedures
- **Programming Languages:** Java, Python, JavaScript, SQL, C
- **Tools:** Git, GitHub, VS Code, Postman
- **Concepts:** Data Structures, Algorithms, API Integration, Responsive Design, Performance Optimization, Agile Development

PROFESSIONAL EXPERIENCE

Wallero Technologies – Software Development Engineer

July 2025 – Present | Hyderabad, India

- Developing scalable frontend applications using React.js and reusable component architecture.
- Integrated REST APIs and optimized frontend rendering to improve performance and user experience.
- Worked with ASP.NET Core backend services and SQL Server stored procedures for enterprise workflows.
- Participated in debugging, testing, deployment, and production support activities.
- Collaborated with Agile teams including QA, backend, and product teams.

Wallero Technologies – Software Development Engineer Intern

Oct 2024 – Mar 2025 | Hyderabad, India

- Built responsive UI components using React.js and JavaScript.
- Integrated APIs and handled asynchronous state management using React Hooks.
- Worked with SQL-backed APIs and optimized query execution.
- Resolved frontend and backend integration issues.

PROJECTS

DEET – Government of Telangana Digital Employment Platform

<https://deet-task.wallero.com/>

- Contributed to a Government of Telangana digital employment and workflow management platform.
- Built scalable React.js frontend modules with responsive UI and reusable components.
- Integrated REST APIs and optimized application performance for enterprise workflows.
- Worked on candidate management systems, workflow tracking, and secure digital features.

Traker – Task and Workflow Management Platform

<https://app.traker.in>

- Developed a full-stack workflow and task management platform.

- Implemented task tracking, workflow monitoring, and productivity management features.
- Built responsive frontend interfaces and optimized API integration.

Yeldam – Healthy Food and Corporate Wellness Platform

<https://yeldam.com/>

- Developed scalable frontend modules and backend API integrations.
- Worked on authentication, product management, and order management features.
- Implemented responsive UI and performance optimization for customer experience.

EDUCATION

Malla Reddy Engineering College, Hyderabad

Bachelor of Technology in Computer Science Engineering | CGPA: 8.41/10 | 2020 – 2024

Sri Chaitanya Junior College, Khammam

Intermediate (MPC) | Score: 9.56/10 | 2018 – 2020

CERTIFICATIONS

- Programming in Java – NPTEL
- Python (Basic) – HackerRank
- Programming in Python – Microsoft Associate
